The Cavendish Laboratory was initially located on the New Museums Site, Free School Lane, in the centre of Cambridge. After perennial space problems, it moved to its present site in West Cambridge in the early 1970s. The oak door of the new Cavendish Laboratory is known for its inscription from the Book of Psalms in the Bible: "The works of the Lord are great, sought out of all them that have ...

Biology is the natural science that studies life and living organisms, including their physical structure, chemical processes, molecular interactions, physiological mechanisms, development and evolution. Despite the complexity of the science, there are certain unifying concepts that consolidate it into a single, coherent field. Biology recognizes the cell as the basic unit of life, genes as ...

Summary. A little over 50 years ago, Sydney Brenner had the foresight to develop the nematode (round  
worm) *Caenorhabditis elegans* as a genetic model for understanding questions of developmental biology and  
neurobiology. Over time, research on *C. elegans* has expanded to explore a wealth of diverse areas in  
modern biology including studies of the basic functions and interactions of eukaryotic ...
