Terminology. Heart failure is a physiological state in which cardiac output is insufficient to meet the needs of the body and lungs. The term "congestive heart failure" is often used, as one of the common symptoms is congestion, or build-up of fluid in a person's tissues and veins in the lungs or other parts of the body. Specifically, congestion takes the form of water retention and swelling ...

“Essential hypertension”™ is high blood pressure for which there is no clearly defined aetiology. From a practical perspective, it is best defined as that level of blood pressure at which treatment to lower blood pressure results in significant clinical benefit—a level which will vary from patient to patient depending on their absolute cardiovascular risk....

Essential hypertension—definition, epidemiology, and

The present phenomenal order will not last for ever. Then, constellations will lose their regularity and the order of this world will be disturbed.
