

complex variables and the pdf

Complex analysis, traditionally known as the theory of functions of a complex variable, is the branch of mathematical analysis that investigates functions of complex numbers.

Complex Variables and Applications, Seventh Edition

A complex number is a number of the form $a + bi$, where a and b are real numbers and i is an indeterminate satisfying $i^2 = -1$. For example, $2 + 3i$ is a complex number. A complex number may therefore be defined as a polynomial in the single indeterminate i , with the relation $i^2 + 1 = 0$ imposed.
