

computer networks wordpress pdf

A computer is a device that can be instructed to carry out sequences of arithmetic or logical operations automatically via computer programming. Modern computers have the ability to follow generalized sets of operations, called programs. These programs enable computers to perform an extremely wide range of tasks.

The recent movie "Transcendence" will not be troubling the sci-fi canon of classics, if the reviews are anything to go by. But its central plot device "uploading" a human consciousness to a computer remains both a central aspiration of transhumanists, and a source of queasy fascination to the rest of us. The idea is that someone's mind is simply a computer programme, that in ...
