Process FMEA Analysis is at the manufacturing/assembly process level. The Focus is on manufacturing related deficiencies, with emphasis on Improving the manufacturing process ensuring the product is built to design requirements in a safe manner, with minimal downtime, scrap and rework.

NANOROBOTIC CHALLENGES IN BIOMEDICAL APPLICATIONS, DESIGN

Computer-aided design (CAD) is the use of computer systems (or workstations) to aid in the creation, modification, analysis, or optimization of a design. CAD software is used to increase the productivity of the designer, improve the quality of design, improve communications through documentation, and to create a database for manufacturing. CAD output is often in the form of electronic files ...

The Merriam-Webster dictionary defines system analysis as "the process of studying a procedure or business in order to identify its goals and purposes and create systems and procedures that will achieve them in an efficient way". Another view sees system analysis as a problem-solving technique that breaks down a system into its component pieces for the purpose of the studying how well those ...
