CIGR is an international, non-governmental, non-profit organization providing a networking system for regional and national societies of agricultural engineering as well as private and public companies and individuals all over the world.

### **CIGR Journal**

Fracture mechanics is the field of mechanics concerned with the study of the propagation of cracks in materials. It uses methods of analytical solid mechanics to calculate the driving force on a crack and those of experimental solid mechanics to characterize the material's resistance to fracture.

History. The application of mechanical engineering can be seen in the archives of various ancient and medieval societies. In ancient Greece, the works of Archimedes (287â€“212 BC) influenced mechanics in the Western tradition and Heron of Alexandria (c. 10â€“70 AD) created the first steam engine ().

This issue contains eight articles that document "advances" in engineering education. The papers cover a wide range of topics, with focus ranging from introductory first year courses to senior capstone design.

## **Advances in Engineering Education**

Despite significant advances in the fabrication of bioengineered scaffolds for tissue engineering, delivery of nutrients in complex engineered human tissues remains a challenge.
