

### **fixed automated spray technology pdf**

Description: Fixed Automated Spray Technology (FAST) systems are an anti-icing treatment method to prevent the formation and bonding of frost, ice and snow to the roadway. FAST systems are typically deployed on bridges, which are often the first locations to become slick or icy during a storm.

### **Fixed Automated Spray Technology (FAST)**

system is called the Fixed Automated Spray Technology (FAST). FAST is an automated flush pavement nozzle that uses information from a Roadway Weather Information System (RWIS) and an active sensor.

### **Fixed Automated Spray Technology August 19, 2011 Introduction**

Fixed Automated Spray Technology (FAST) systems are designed as a fixed asset technology for anti-icing operations at specific target areas such as bridges, tunnels, ramps and other elevated roadways.

### **1 FIXED AUTOMATED SPRAY TECHNOLOGY: CURRENT PRACTICES AND**

Evaluation of NDDOT Fixed Automated Spray Technology (FAST) Systems Shawn Birst, PE Program Director, ATAC. Associate Research Fellow. Upper Great Plains Transportation Institute. North Dakota State University. November 24, 2009.

### **Evaluation of NDDOT Fixed Automated Spray Technology (FAST)**

Fixed Automated Spray Technology. Over several decades, the Boschung Fixed Automated Spray Technology (FAST) has proven its worth as stationary winter maintenance equipment. Many years of experience and ongoing development have resulted in a systematic solution which operates safely and ecologically.

### **Fixed Automated Spray Technology - Boschung America, LLC**

PDF | This paper synthesizes information obtained from a comprehensive literature review and agency surveys on the state of the practice of fixed automated spray technology (FAST) systems. Experience with FAST systems in North America and Europe has revealed a mixed picture.

### **(PDF) Anti-icing for key highway locations: Fixed**

Fixed automated spray technology (FAST) has emerged as a solution to provide quick, effective service delivery to high-risk locations prone to icy conditions or with high traffic volumes.

### **Safety Effects of Fixed Automated Spray Technology Systems**

Fixed Automated Spray Technology. Over several decades, the Boschung fixed automated spray technology (FAST) has proved its worth as stationary winter maintenance equipment. Many years of experience and ongoing development have resulted in a systemic solution which operates safely and ecologically.

### **FAST - Fixed Automated Spray Technology - Boschung Group**

Department of Transportation (CDOT) on the effectiveness of Fixed Automated Spray Technology (FAST) systems. FAST systems have emerged as an important way to supplement mobile winter maintenance operations by enabling winter maintenance personnel to treat selected locations before snow and ice problems arise.

### **Benefit-Cost Analysis of CDOT Fixed Automated Spray**

Fixed Automated Spray Technology, or FAST, is a specific method of performing Anti-Icing operations. FAST

systems combine atmospheric and pavement data from a Road Weather

**Evaluating Automated Anti-Icing Technology to Reduce**

choose from different spray configurations (i.e., rate, mix, and time) based on the observations or sensor readings, and Anti-icing for key highway locations: fixed automated spray technology
