The meat ant (*Iridomyrmex purpureus*), also known as the gravel ant or southern meat ant, is a species of ant endemic to Australia. A member of the genus *Iridomyrmex* in the subfamily Dolichoderinae, it was described by British entomologist Frederick Smith in 1858. The meat ant is associated with many common names due to its appearance, nest-building behaviour and abundance, of which its specific ...

It's taken 21 months, four professors, and three associate/assistant professors, and THIS is the best they could come up with? The printed version listed no author (the pdf has been updated with John Cooks name\*) yet wears the logo of the University of Western Australia (UWA), which will embarrass that university as word spreads of the intellectual weakness of their "Guide".
