

introduction to cosmology ryden pdf

In physical cosmology, cosmic inflation, cosmological inflation, or just inflation, is a theory of exponential expansion of space in the early universe. The inflationary epoch lasted from 10^{-36} seconds after the conjectured Big Bang singularity to sometime between 10^{-33} and 10^{-32} seconds after the singularity. Following the inflationary period, the universe continues to expand, but at ...

Inflation (cosmology) - Wikipedia

In cosmology, recombination refers to the epoch at which charged electrons and protons first became bound to form electrically neutral hydrogen atoms. Recombination occurred about 378,000 years after the Big Bang (at a redshift of $z = 1100$). The word "recombination" is misleading, since the big bang theory doesn't posit that protons and electrons had been combined before, but the name exists for ...
