

julia programming for operations pdf

Julia is a high-level dynamic programming language designed to address the needs of high-performance numerical analysis and computational science, without the typical need of separate compilation to be fast, while also being effective for general-purpose programming, web use or as a specification language.

Julia (programming language) - Wikipedia

JuMP-dev Workshop 2018, Bordeaux. The second annual JuMP-dev workshop will be held at the Institut de Mathématiques de Bordeaux, University of Bordeaux on June 27-29.
