

nace mr0175 iso 15156 pdf

Q: Is it possible to produce remanufactured cast valve bodies that comply with NACE MR0175/ISO 15156 and NACE MR0103? A: For most common cast materials, the simple answer to this question is "No," but that answer deserves explanation. Let's start by comparing the legacy NACE standard MR0175 version 2002 (and previous versions) with the current version (NACE MR0175/ISO 15156) and NACE MR0103.

Sulfide stress cracking (SSC) is a form of hydrogen embrittlement which is a cathodic cracking mechanism. It should not be confused with the term stress corrosion cracking which is an anodic cracking mechanism. Susceptible alloys, especially steels, react with hydrogen sulfide, forming metal sulfides and atomic hydrogen as corrosion byproducts. Atomic hydrogen either combines to form H₂ at ...
